1.

Circles represent 20
Triangles represent 10
Squares represent 50

What is the value of each row and column?

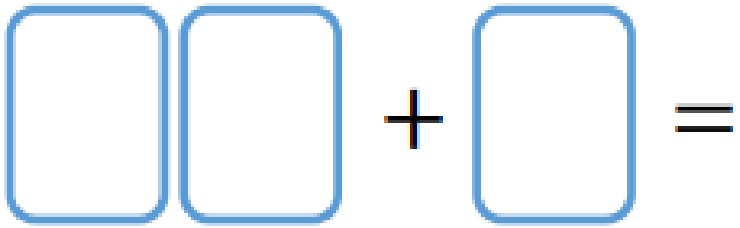

2.

Here are three digit cards.

Place the digit cards in the number sentence.

How many different totals can you find?

What is the smallest total?

What is the largest total?

3.

Annie has 33 stickers.

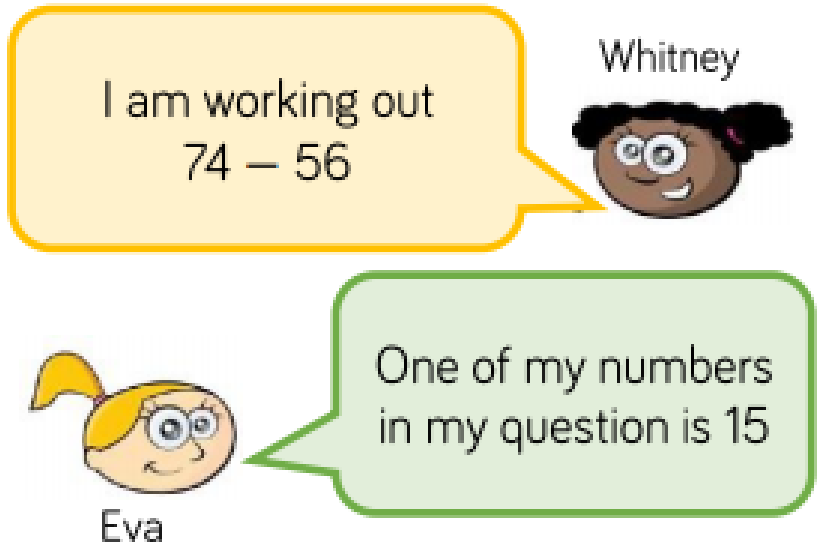

Dexter has 54 stickers.

How many more stickers does Dexter have?

What method did you use to solve the problem?

4.

Eva and Whitney are working out some subtractions.

Whitney's answer is double Eva's answer.

What could Eva's subtraction be?

5. Find the greatest whole number that can complete each number sentence below.

$$45 - 17 > 14 + ____$$

$$26 + 15 < 60 - ____$$

Explain your answer.

Answers

1.

Rows (top to bottom)	Columns (left to right)
80	80
80	80
30	30

2.

$67 + 8 = 75$
$68 + 7 = 75$
$76 + 8 = 84$
$78 + 6 = 84$
$86 + 7 = 93$
$87 + 6 = 93$

75 is the smallest total.

93 is the largest total.

3.

Ron has 25 marbles.

Altogether they have 37 marbles.

4.

Whitney's answer is 18

Eva's answer is 9

Eva's question could be $15 - 6$ or $24 - 15$

5.

$45 - 17 > 14 + ___$	13
$26 + 15 < 60 - ___$	18
